Design Doc – Mossbudd

By Vick

- **Industry:** Art and Design
- **Target Audience:** Teens, young adults, furries, anime and game fans
- **Brand Personality:** playful, fun, creative, friendly, whimsical, approachable
- **Goals:** attend conventions, find buyers, sell art
- **Unique Selling Points:** clear custom reference sheets, unique rendering style
- **Rationale:** Creating custom digital artwork
- **Branding:** playful, nostalgic, warm, crafty, hand-drawn and textured, cluttered, maximalist, nature-themed
- **Inspiration and Research:** nature, collage, scrapbooking, arts and crafts, the 70's

• **Color Scheme:** earthy greens, teals, muted oranges and yellows, warm browns, creams, pops of bright red and blue. Very 70's inspired. Creates a natural, comforting, and fun feel.

• **Typography and shape usage:** rounded bubbly font for headings and a more readable clean font for body text. Creates a playful tone while still being readable

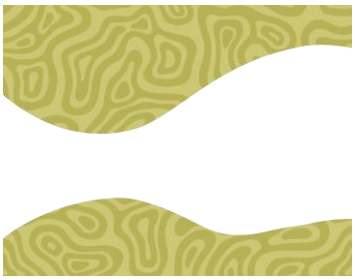
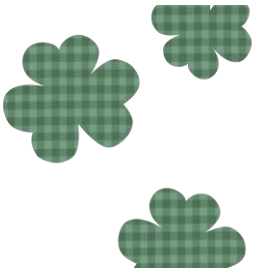
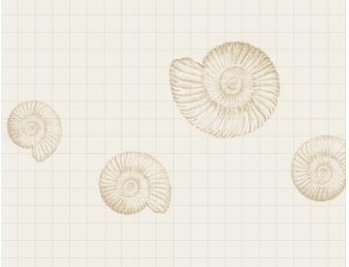
• **Shape usage:** Soft organic shapes (clovers, waves, swirls), paper tear effects, different textures, grid patterns (sketchbook and planner feel), flowers, stars, spirals. Mix of shapes creates a handmade, slightly chaotic feel







• **Message:** Mossbudd is a safe space for creativity, hand-drawn human made art made to spark joy and comfort.

• **Tools Used:** Photoshop (for making the individual elements) , Indesign (for creating poster, business card, leaflet, and brochure), Adobe Illustrator (for making the logo and the colourful lines), Medibang Paint Pro and Procreate (for the drawings and sketches)

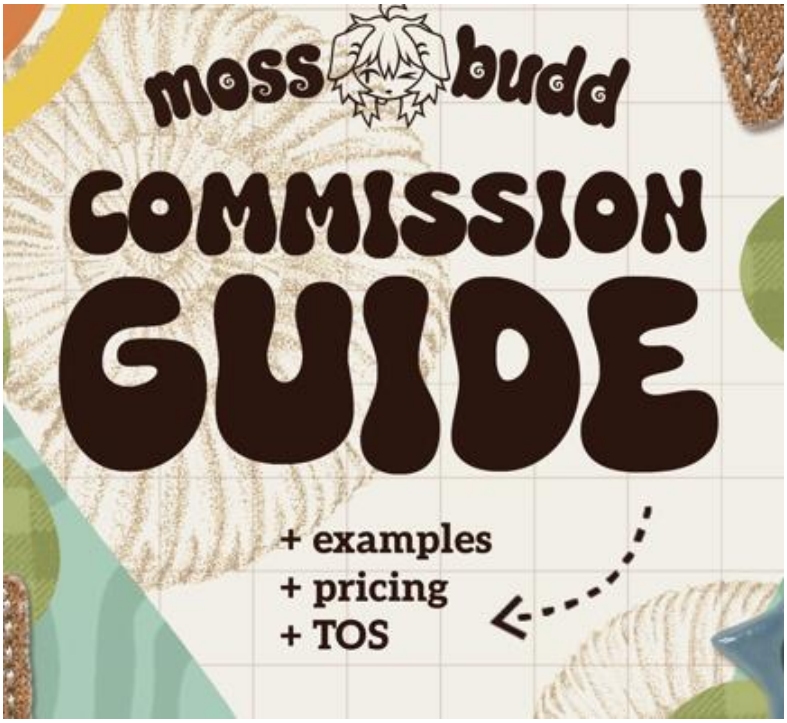
• **Sketches:**

• **Design principles:**

Contrast in dark text on a light background and in the smooth vector shapes paired with organic textures.

Asymmetrical design makes it feel dynamic

Most important elements are emphasized by being in large, bold font



Hierarchy of headings and body text

Repetition is used in all the elements to keep the designs harmonious

Proximity with elements that are related to eachother

Colour palette and shapes give a sense of unity

Movement is achieved through arrows and curves

- **Own content:** **All art used was created by me**
- **Social Media:** **has my social media handles where you can view my art**

- **Challenges:** I was unfamiliar with some features which would have made my workflow much faster if I had known about them. Also, some elements weren't as high resolution as I'd hoped after exporting, which was difficult to notice in InDesign
- **References:** Used Pinterest for most of the elements
